Tacrolimus (FK506), Blood

Test	Current Result and Flag		Previous Result and Date		Units	Reference Interval
Tacrolimus (FK506), Blood ^{A,01}	13.0		3.8	04/08/2026	ng/mL	5.0-20.0
Target steady state trough concentration for Tacrolimus varies based on type of organ transplant immunosuppressive protocol and other patient specific factors. Tacrolimus trough concentrations should be interpreted in conjunction with clinical assessments of rejection and tolerability. Values obtained with different assay methods cannot be used interchangeably due to differences in assay methods and cross-reactivity with metabolites, nor should correction factors be applied. Therefore, consistent use of one assay for individual patients is recommended. Detection Limit = 0.5 ng/mL Performed by LC-MS/MS technology.
